

AICTE vs NAMASTE

Features, Limitations, Gaps & Proposed Opportunity for an Ayurveda Student Platform

1. AICTE – Top Features

- Internship opportunities connecting students with companies, startups, MSMEs and organizations.
- Jobs and career opportunities for students.
- Resume-building and career-profile support.
- Connection with employers and recruiters.
- Interview-preparation resources and career support.
- Opportunities across multiple domains such as IT, management, marketing, finance and emerging technologies.
- College–industry connection and internship-related institutional support.
- Online/remote and hybrid internship opportunities.

2. NAMASTE – Top Features

- Standardized AYUSH terminology for Ayurveda, Siddha and Unani systems.
- National morbidity terminology and coding resources.
- A centralized platform for browsing standardized terminology and codes.
- Useful for AYUSH students, practitioners, hospitals, researchers and policymakers.
- Digital submission/management of aggregate morbidity statistics.
- Data visualization and statistical views for AYUSH health information.
- Supports networking and integration of AYUSH information with broader health-information systems.
- Provides access to terminology and coding resources for stakeholders.

3. AICTE vs NAMASTE vs Proposed Ayurveda Platform

Feature	AICTE	NAMASTE	Opportunity for Project
Student-focused	Strong	Limited	Platform specifically for Ayurveda students
Internships	Yes	Not core	Ayurveda-specific internships and projects
Mentorship	General/limited	Not core	Connect with practitioners, teachers and researchers
Clinical exposure	Not specialized	Health-data focused	Clinical learning and exposure opportunities
Ayurveda learning resources	General	Terminology/resources	Notes, cases, videos and learning material
Research opportunities	General	Health/research data	Ayurveda research/project matching
Skill development	Yes	Not core	Ayurveda + modern professional/research skills
Industry connection	Yes	Not core	Hospitals, clinics, companies and startups
Progress tracking	General	Data/statistics	Personal student skill/career dashboard
Competitions	Available	Not core	Ayurveda innovation challenges
Portfolio/CV	Yes	No	Ayurveda student portfolio
Personalized recommendations	Limited	No	AI recommendations for learning/career
Networking	General	Healthcare ecosystem	Ayurveda student/alumni/practitioner network
Career guidance	Yes	No	Career paths specifically for Ayurveda students
AI assistance	Some	Limited	AI learning and career assistant

4. Major Gaps in Existing Platforms

AICTE: AICTE is broad and serves students across many fields. Its main strength is education, internships and career connectivity rather than an Ayurveda-specific learning, clinical, mentorship and research ecosystem.

NAMASTE: NAMASTE is valuable for standardization of AYUSH terminology and health-related data, but it is not primarily a student career-development platform covering the complete journey from learning to internship, research and employment.

5. Proposed Platform – Key USP

“A centralized digital ecosystem for Ayurveda students that connects learning, clinical exposure, mentorship, internships, research and career opportunities in one place.”

6. Suggested Core Modules

- **Learn** — Ayurveda notes, shlokas and terminology, videos, subject-wise resources and quizzes/MCQs.
- **Experience** — Hospital/clinic opportunities, clinical case learning, internships and practical skill development.
- **Connect** — Faculty mentors, Ayurveda practitioners, researchers and alumni networking.
- **Research** — Research opportunities, papers/resources, student projects and collaboration.
- **Career** — Ayurveda jobs, internships, career paths, resume/portfolio and skill recommendations.
- **AI Assistant** — Personalized learning recommendations, career guidance, opportunity matching and platform-resource assistance.

7. Strong PPT Statement

“Existing platforms such as AICTE and NAMASTE solve individual parts of the ecosystem, but there is a gap in a unified, student-centric platform specifically designed for Ayurveda education, practical exposure, research and career

development.”
