

India’s Ayurveda Job Market & Job-Board Gap Analysis

SIH Project – Research & Competitive Analysis

1. Executive Summary

India mein Ayurveda/BAMS employment opportunities available hain, lekin unke sources fragmented hain. Candidates ko niche Ayurveda portals, individual company career pages, general job portals aur government/research vacancy pages alag-alag check karne padte hain. Is fragmentation se students aur freshers ke liye relevant jobs discover karna, eligibility samajhna aur applications manage karna difficult ho jata hai.

2. Existing Ayurveda / Healthcare Job Sources

Platform / Source	Primary role	Key limitation / missing area
Jiva Jobs	Jiva clinics, telemedicine & Panchakarma integrations	Single-employer focused; multi-employer marketplace nahi
Ayurveda.in Jobs	Ayurveda-related job listings	Structured BAMS career ecosystem aur detailed filters limited
AyurConnect	BAMS profiles, patient leads & career/job openings	Complete fresher-to-career pathway limited
Individual company career pages	Direct applications to Ayurveda companies	Har company ki website alag; jobs scattered
LinkedIn	Large professional/job network	Ayurveda-specific verification and structured filters weak
Indeed	BAMS/Ayurveda & healthcare vacancies	Dedicated Ayurveda career ecosystem nahi
CCRAS vacancy pages	Research/project/consultant opportunities	Government/research focused; private-job marketplace nahi
AIIA / AYUSH institute vacancy pages	Teaching/clinical, research & non-teaching vacancies	Job-board style discovery and unified applications limited

3. Major Gaps in the Current Market

- **1. Scattered job discovery:** Students may need to search Jiva, LinkedIn, Indeed, company websites and institute/research vacancy pages separately.
- **2. Weak Ayurveda-specific categorization:** A single “Ayurveda” search can mix clinical, wellness, sales, marketing, pharma and other roles.
- **3. Fresher difficulty:** Entry-level candidates often see jobs requiring prior experience. A dedicated Fresher/Internship filter is valuable.
- **4. Qualification matching:** BAMS qualification, internship status, registration, skills and experience are not consistently matched against each vacancy.
- **5. Verification:** A dedicated platform can verify candidate credentials and employers, increasing trust in healthcare recruitment.
- **6. Salary transparency:** Salary information is inconsistent across listings. Showing salary ranges can help candidates compare opportunities.
- **7. Career-path support:** Students need more than jobs—internships, research, pharma, teaching, wellness and entrepreneurship opportunities can be connected.
- **8. Application fragmentation:** Different employers use different forms/websites. A unified profile and simplified application flow can reduce friction.

4. Ayurveda Career Categories for the Proposed Portal

Clinical / Physician • Panchakarma • Hospitals • Research • Ayurveda Pharma • QA/QC • Medical Content • Teaching • Wellness • Teleconsultation • Medical Sales • Healthcare Administration

5. Proposed SIH Solution

Proposed concept: **a verified, Ayurveda-focused career ecosystem** connecting students, graduates, professionals and employers. The platform should not simply copy a generic job board; it should solve Ayurveda-specific discovery, eligibility, verification and career-navigation problems.

Feature	How it solves the problem
Smart Job Matching	Qualification + skills + location + experience ke basis par relevant jobs suggest kare.
AYUSH/Ayurveda-specific categories	Clinical, Panchakarma, research, pharma, wellness, teaching etc. ko separately organize kare.
Fresher / Internship filter	Students ko entry-level opportunities quickly identify karne de.
Verified Candidate Profile	Degree, internship, registration and relevant certifications ko verify karne ka framework.
Verified Employer	Hospitals, clinics, companies and organizations ke verification indicators.
Salary Transparency	Offered/expected salary range clearly display kare.
Eligibility Indicator	“Why am I eligible?” – matched and missing requirements clearly show kare.
Unified Profile & Application	Candidate ek profile maintain karke multiple opportunities ke liye apply kar sake.
Career Pathway	BAMS ke baad job, PG, research, pharma, wellness, teaching and entrepreneurship options show ka

6. Strong USP for the SIH Presentation

“One verified career ecosystem for Ayurveda students and professionals.”

Instead of being only a vacancy-listing website, the platform can combine verified profiles, smart matching, internships, entry-level jobs, employer verification, salary transparency and long-term Ayurveda career guidance.

7. Example User Journey

BAMS Student → Create profile → Add skills/internship status → Select preferred location → Smart matching → See eligibility → Apply → Track application → Build experience → Move toward specialized career opportunities.

8. Competitive Positioning

Generic job portals: large reach but low specialization.

Healthcare portals: healthcare-focused but Ayurveda is only one segment.

Niche Ayurveda platforms: strong domain focus but comparatively limited as a complete multi-employer career marketplace.

SIH opportunity: combine domain specialization + verification + smart matching + student-first career journey.

9. Conclusion

The opportunity is not simply to create another job-search website. The stronger SIH proposition is to build an **Ayurveda-specific, verified and qualification-aware recruitment ecosystem**. This directly addresses fragmented job discovery, fresher challenges, qualification matching, trust, salary transparency and disconnected application processes.
